Business History

Online Business Sales are delighted to offer to the market this unique and incredibly on-trend food supply business which was created by our client in 2013 and which is only now being offered to the market due to our clients' ill health. Borne out of a strong desire to promote good health and well-being, whilst encouraging individuals to make good nutritional choices, our client has developed a range of products based on the latest medical advice and evidence available. Our client has thoroughly researched and secured the brand obtaining accreditations and trademarks and has sourced only the very best suppliers for his products. The business currently supplies a growing number of vegan, wholefood and health retailers as well as a number of gluten free and vegan baked goods producers and eateries. The business supplies ethical and healthy gluten-free, organic and vegan flours sourced from high quality grains and seeds which are completely additive and preservative free. The flour range is extensive, including sunflower, spelt, red lentil, millet, rye, amaranth, buckwheat, oat and coconut, to name but a few, all packaged in eco-friendly recyclable packaging. In addition to the extensive range of flours, our clients supply raw natural seeds and raw honey as well as a specialist range of FUSION honey and the very exciting No BEE Vegan HONEE® which our client advises is the UK's first and only of its kind. All products are barcoded and ready for retail. The business includes everything needed to successfully grow and is primed for a full marketing campaign to increase stockists and users. This is a rare opportunity for an true entrepreneur to take the business to the next, exciting level. The business would also be ideal for an existing complementary business to add as a bolt on. The opportunity here for the right person cannot be overstated.
